

# Members Reporting System

# Introduction

## What is MRS? (Members Reporting System)

- Provides strategic analytical data at ward and district level
- Highlights key strategic statistics such as crime data, unemployment rates, health data and service requests.
- Monitors trends and benchmarks performance.

# Introduction

## What is MRS? (Members Reporting System)

- Internally, the system collates information on FOI requests and Complaints.
- Externally the system collates information on data sets such as labour force data, crime statistics and empty properties.
- The system is highly customisable and can be adapted to cater for additional data sets

# When can the system be used?

- In meetings data can be brought up to validate or challenge information.
- When canvassing important data can be brought up to counter myths.
- To assist in setting targets and prioritises.

# Next Steps

- For Staff to begin to enter data
- To export the model so it is accessible via IPADs
- To explore any additional data sets that maybe suggested

# Next Steps

- Preview of the Bolsover MRS Model
- Preview of the North East Derbyshire Model
